At **3FOLD Uniforms**, we are committed to ensuring that our customers get the most out of their uniforms. Understanding the importance of maintaining the professional appearance and longevity of your garments, we have prepared a series of Garment Care Guides covering garments generally with particular notes for embroidery, screen printing, heat press / supacolour and sublimation. By following these guidelines, you can maximise the wearability and life of your uniforms, reflecting the high standards of your organisation.

Sublimated Garments Care

To maintain the quality of sublimated uniforms and ensure your branding remains vibrant, please adhere to the following specialised care instructions. Please always refer to the garment tag for instructions specific to each garment.

Washing

- **Inside Out:** Turn the garment inside out before washing. This minimises wear on the decorated area.
- **Mild Detergent:** Opt for mild detergents and avoid using bleach, fabric softeners, and harsh detergents, as they can degrade the decoration's quality.
- **Temperature:** Use cold water or a mild warmer cycle to prevent damage to the sublimation.
- **Cycle Settings:** Opt for delicate and low spin cycles to reduce the risk of altering the garment.

Drying

- **Cool Setting:** If using a clothes dryer, select a cool setting and opt for a shorter cycle to prevent heat damage to the sublimation.
- **Air Dry:** Avoid high heat or direct sunlight. If possible, air dry the garment in a shaded area.

Ironing

- **Reverse Ironing:** Do not iron directly over the sublimation. If ironing is necessary, turn the garment inside out and use a barrier, such as a tea towel or light fabric.

By following these guidelines, you can ensure the durability and continued professional appearance of your sublimated garments.
